CC105 PEER CODE AUDIT EVALUATION FORM

Author Name : [Poblete, Don Gabriel T. & Ang, Lovely Esther]

Reviewer Name : [Your Name / Peer Reviewer]

Date of Audit : [October 5, 2026]

Repository Link: [https://github.com/luvlyz0507/CC105_WEEK5_Ang_Poblete_]

1. IDENTIFIED STRENGTHS (At least 3 positive engineering practices observed)

- Uses RAII and proper memory cleanup.
 - Handles invalid access with errors.
 - Uses constants and clear template types.
-

2. IDENTIFIED WEAKNESSES / DEFECTS (At least 3 structural or style issues)

- processMatrix() still has fixed parameter sizing.
 - Missing copy constructor and copy assignment operator.
 - Matrix transposition code needs clearer comments.
-

3. RECOMMENDED ACTIONABLE IMPROVEMENTS (At least 3 recommendations)

- Use templates for more flexible data types.
- Add shrink_to_fit() for unused memory.
- Add const to getter and search functions.

DEVELOPER ACTION & REJECTION JUSTIFICATION (To be filled by Author)

- Recommendation 1: Accepted and will use template classes.
- Recommendation 2: Partially accepted because manual capacity is kept for Milestone 1.
- Recommendation 3: Accepted and const was added to accessor methods.
